We see circulating among the papers, a calcula-tion of the center of the representative population at each census, since the adoption of the Con- road-making tracks for Texas-was overtaken stition. The subject is a curious one to know near Col. Kinney's by another white man named where the mass of the population is moving to. We commend the following to the advocates of capital punishment.

HORRIBLE SCENE AT AN EXECUTION .- On the 8th instant, Pierre Lescure, who was accused of the murder of his father, but not brought to trial for want of sufficient evidence, and who has since been condemned to death for making way with The circumstances attending the execution were most horrifying. Being a man of herculcan strength, he was bound in prison with an unusual weight of chains. It required at least half an hour for the smith to unrivet them. Lescure was much weakened by his confinement, and assistance was offered him in walking to the scaffold, but he declined it, and went forward, and even ascended the ladder with a firm step. Fearing resistance, the executioners of St. Flour and Moulins were called in to aid the executioner of Riom. When Lescure appeared on the platform, his tall and athletic person towered above them and the priest who attended him.-Unfortunately he was not bound with sufficient force to the swing board, which also was too short for his length, so that his neck went beyond the groove, and the axe, when loosened, fell on the rood of the frame, and only wounded its intended victim. Upon this the executioner from St. Flour got astride on the head of Lescure, but the convict struggled from his grasp, and breaking his bands, rose again, with his shoulders and breast covered with blood, his face flushed, and his eyes haggard, uttering cries that struck terror

to the heart of every spectator.

The priest approached the wretched man, and, presenting to him the image of Christ on the oss, succeeded by his exhortations in prevailing on him to again submit to be bound. Again the axe fell, and again missed its mark, only enlarg-Lescure's cries more astounding. The people shouted with indignation, and pressing round the scaffold, were on the point of overcoming the gendarmerie in attendance, while the priest, whose surplice was covered with blood, embraced and did all in his power to console and calm the mutilated man.

The three executioners were for a time com-pletely paralyzed; but at last one of them muster. ed resolution enough to fix the devoted head in a proper position, and the axe, already streaming with blood, fell a third time and completed its task. The executioners are, it is said, to be dis missed from their office .- Galignani.

GREAT FIRE IN CHILI - The Journal of Commerce of vesterday has a letter which says :

The city of Sun Carlos, the principal town in the Island of Chiloe, the most Southern province of the Chilonn Republic, has been the scene of a dreacful coollagration, which broke out in its very center, and before it could be subdued, destroyed two-thirds of the place. One hundred and fivy houses, comprising all the magazines of provisions, fell a prey to the flumes. The autoritanate inhabitants, equally desittate of foot and shelter, were competted to abandon the rains, and fly to the interior to seek a refuge and means of subsistence.

The port of San Carlos a recruiting place fre-

quenced by South Sea whalers, contained about 4,000 inhabitants, all of whom have suffered more or less by this deplorable calamity. At the time of the fire there were anchored in the road an American schooner, a British brig, and a French whale-ship. the crews of which, it is superfluous to add, per-formed all the duties that humanity imposed on

ANOTHER WARNING .- The Baltimore Sun states that on Tuesday, a young man called at the house of a friend "in the neighborhood of Aisquith street, and found a part of the family in the back room; one of them, a young lady, was sitting on the first step of the stairs sewing. picked up a pistol lying on the window, which had just been put there by her brother, and calling by name, said he would shoot her. He im mediately suited the action to the word, the pistol instantly exploded, charged with ball and shot

The bail and shot passed by her temples and penetrated the wall close to her head. Three of the shot took effect; one penetrated the face about an inch below the right eye, and two passed into the upper lip on the right side. Happily the wounds are not dangerous. It is truly amaz ing, after so many repeated calamities, that any one will attempt to snap fire arms at another. It deserves the severest censure."

ELECTION RETURNS, VIA SMYRNA .- The Eche de l'Orient, a Smyrna paper of the 27th of April, under the head of "The United States," has a remarkable piece of intelligence not generally known in this quarter; is of such importance that we translate it as follows: "The Presidential Election is decided. Mr. Van Buren has carried it. He received 91 votes, Mr. Johnson, 36, and and Mr. Caes, 1. Colonel Johnson has been raised to the Vice Presidency." [Bos. Daily Adv

A DISTRESSING ACCIDENT .- The Apalachicola Advertiser of the 27th ult. says: "On Monday last Charles Russell, formerly a Lieut. of the Revenue Cutter at Mobile, while on a pleasure excursion to St. Andrews, had his right hand blown to pieces by the explosion of a powder flask. He was pouring some powder on a match of ignited cotton when the accident happened." It was feared that he would not recover.

THE WESTERN MAILS .- The Postmaster a Vincennes writes to the Postmaster of Louisville under date of the 30th ult. "that the bridges be tween Olney and Maysville, Ill. have been car ned off by the late rains, and that consequently the mail cannot be forwarded till the high waters

"CONDUCT OF WHITE FOLKS IN THE CHOCTAW NATION."-A white man named John Lewis, who, with his family, was traveling on the military and one at the breast—out upon the road. The deplorable sight of his suffering family rendered desperate the ill-used father, who "borrowed a line ea st and west. We may, therefore, assume that as the base line of comparison. In 1790 the had no sooner installed his interesting family in center of representation was 13 miles south of that it than Shaw returned with several armed men, and after "discharging several rounds" compellton.
